Summary

Hi there!
I'm a third year undergrad pursuing Bachelor of Engineering (B.E.)
from Jadavpur University.

I'm a MERN stack web developer with a passion for creating
beautiful and functional web applications. I have experience building
responsive and user-friendly web interfaces using React, Node.js,
MongoDB, and Express.

When I'm not working on web development projects, you can
find me practicing my problem-solving skills through competitive
programming and DSA. I have a knack for quickly learning new
concepts and applying them to real-world problems, which makes
me a valuable asset to any team.

And when I need a break from the screen, I enjoy playing chess and
using it as a way to unwind and sharpen my strategic thinking skills.

If you're interested in collaborating on a project or just want to
connect, feel free to send me a message. I'm always eager to meet
new people and explore new opportunities.

Experience

The West Bengal Power Development Corporation Limited
(WBPDCL)
Industrial Trainee
January 2024 - January 2024 (1 month)

Major League Hacking
Local Hack Day: Build
January 2022 - January 2022 (1 month)

Was part of Major League Hacking's Local Hack Day. Became top 9% out of a global participant pool of over 3k participants. Earned Bonus Swags for active participation. Discovered and built projects of various new technologies:-
> Learnt about Linode by creating projects using Cloudron and Discourse.
> Built a CLI Chat Server using Python and Linode.
> Discovered Deepgram by transcribing voice and videos.
> Learnt how to use Twilio by creating a hack which sends messages and poems.
> Discovered Process Mining through Celonis.
> Created a mobile-design mockup using Figma.
